REACH Compliance Statement for CMT Products

Dear CMT Customer:

REACH (Registration, Evaluation, Authorization and restriction of Chemicals) was established by Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006, and established the ECHA (European Chemicals Agency) to regulate chemicals and their safe use. The first list of SVHCs (Substance of Very High Concern) was published by the ECHA in 2008 and expanded in January 2010. CMT understands the ECHA plans to update (expand) the SVHC list up to twice per annum. Customers will be informed if and when any published SVHC are present in CMT products above a threshold limit of 0.1% (1,000 ppm).

Products manufactured by Custom Machine & Tool are considered to be articles with no intended release of chemicals during their normal use under the REACH Regulation and do not contain substances of very high concern. Therefore, under Article 7 of the REACH Regulation, registrations or notifications are not required with the European Chemicals Agency (ECHA) at this time.

This letter is provided for informational purposes only and is not intended to create legal obligations between CMT and the recipient of this letter. CMT believes the above and related statements made in published CMT compliance-related documentation, including but not limited to any material composition data, MSDS, laboratory and testing reports, to be valid and accurate as at the date of the corresponding statement, but makes no representation to the completeness or accuracy of information provided herein to the extent such information is provided by CMT's third party suppliers.
